

Financials Income Fund Historical Allocation

Financials focus designed to generate attractive yield with low correlation to traditional fixed income

The Fund seeks to generate current income across various market environments with a secondary focus on generating positive total return. The Fund has a long-term focus on the financial sector and invests primarily in banks, including senior and subordinated debt, TruPS and equities, as well as debt of other financial services companies, including finance companies, brokerage and advisory firms, insurance companies, BDCs and REITs. The Fund also invests in financial institutions that have been designated as Responsible Financial Institutions (RFIs), exhibiting strong alignment with environmental, social and governance (ESG) factors.

¹The inception date of both the Angel Oak Financials Income Fund A and I Class (ANFLX and ANFIX) was 11/3/14.

²Maximum Offering Price takes into account the 2.25% maximum initial sales charge.

³Bloomberg Barclays U.S. Aggregate 3-5 Year Index: An index that tracks bonds with 3-5 year maturities within the Bloomberg Barclays U.S. Aggregate Bond Index.

It is not possible to invest directly in an index.

BDC: Business Development Company.

CMBS: Commercial mortgage-backed securities.

RMBS: Residential mortgage-backed securities.

Correlation: A statistical measure of how two securities move in relation to another. Index used for comparison is the Bloomberg Barclays U.S. Aggregate 3-5 Year Index.

Responsible Financial Institution (RFI): A designation developed by Angel Oak Capital Advisors to indicate financial institutions with an objectively measurable commitment to environmental sustainability, social responsibility and strong corporate governance.

Must be preceded or accompanied by a prospectus. To obtain an electronic copy of the prospectus, please visit www.angeloakcapital.com.

Mutual fund investing involves risk; principal loss is possible. Investments in debt securities typically decrease when interest rates rise. This risk is usually greater for longer-term debt securities. Investments in lower-rated and nonrated securities present a greater risk of loss to principal and interest than higher-rated securities do. Investments in asset-backed and mortgage-backed securities include additional risks that investors should be aware of, including credit risk, prepayment risk, possible illiquidity, and default, as well as increased susceptibility to adverse economic developments. Derivatives involve risks different from—and in certain cases, greater than—the risks presented by more traditional investments. Derivatives may involve certain costs and risks such as illiquidity, interest rate, market, credit, management, and the risk that a position could not be closed when most advantageous. Investing in derivatives could lead to losses that are greater than the amount invested. The Fund may make short sales of securities, which involves the risk that losses may exceed the original amount invested. The Fund may use leverage, which may exaggerate the effect of any increase or decrease in the value of securities in the Fund's portfolio or the Fund's net asset value, and therefore may increase the volatility of the Fund. Investments in foreign securities involve greater volatility and political, economic, and currency risks and differences in accounting methods. These risks are increased for emerging markets. Investments in fixed-income instruments typically decrease in value when interest rates rise. The Fund will incur higher and duplicative costs when it invests in mutual funds, ETFs, and other investment companies. There is also the risk that the Fund may suffer losses due to the investment practices of the underlying funds. For more information on these risks and other risks of the Fund, please see the Prospectus.
