

# Angel Oak Multi-Strategy Income Fund

The strategy seeks the best risk-adjusted opportunities in fixed income that offer the potential for both stable income and price appreciation. The team employs a top-down approach to identify relative value opportunities within the structured credit markets and a bottom-up credit selection process to select individual issues. The managers will invest opportunistically across a wide range of credits and issuer types based on relative value within fixed income.

Specifically, the strategy targets opportunities in:

- Non-Agency Residential Mortgage-Backed Securities (Non-Agency RMBS)
- Asset-Backed Securities (ABS)
- Collateralized Loan Obligations (CLO)
- Agency and Non-Agency Commercial Mortgage-Backed Securities (CMBS)
- Agency Residential Mortgage-Backed Securities (RMBS)

## GROWTH OF \$10,000 SINCE INCEPTION (AS OF 12/31/20)

This chart illustrates the performance of a hypothetical \$10,000 investment made in Angel Oak Multi-Strategy Income Fund (ANGIX) I Shares since inception on 6/28/11. It assumes reinvestment of capital gains and dividends. This chart is not intended to imply any future performance.

TOTAL RETURNS (AS OF 12/31/20)	Annualized					
	4Q20	YTD	1 YEAR	3 YEAR	5 YEAR	INCEPTION <sup>1</sup>
Class I	2.28%	-1.77%	-1.77%	1.98%	3.18%	5.88%
Class A at NAV	2.21%	-2.01%	-2.01%	1.73%	2.93%	5.65%
Class A at MOP <sup>2</sup>	-0.13%	-4.18%	-4.18%	0.96%	2.47%	5.40%
Index <sup>3</sup>	0.67%	7.51%	7.51%	5.34%	4.44%	3.73%

ANNUAL RETURNS	2020	2019	2018	2017	2016	2015	2014	2013	2012
Class I	-1.77%	4.98%	2.85%	5.74%	4.28%	2.01%	5.84%	4.12%	22.84%
Class A at NAV	-2.01%	4.71%	2.61%	5.44%	4.08%	1.67%	5.56%	3.87%	22.72%
Index <sup>3</sup>	7.51%	8.72%	0.01%	3.54%	2.65%	0.55%	5.97%	-2.02%	4.21%

<sup>1</sup>The inception date of the Angel Oak Multi-Strategy Income Fund A Class (ANGLX) was 6/28/11, while the inception date of the Institutional Class (ANGIX) was 8/16/12. The returns of ANGIX shown for periods prior to the inception date include the returns of ANGLX and are adjusted to reflect the operating expenses of ANGIX. <sup>2</sup>Maximum Offering Price takes into account the 2.25% maximum initial sales charge. <sup>3</sup>Bloomberg Barclays U.S. Aggregate Bond Index. <sup>4</sup>Correlation to Index is daily as of 12/31/20. See reverse for definition.

*Performance quoted is past performance and is no guarantee of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data shown. Current performance for the most recent month-end can be obtained by calling 855-751-4324 or by visiting [www.angeloakcapital.com](http://www.angeloakcapital.com).*

\*Gross expense ratios are reported as of the 5/31/20 prospectus. The net expense ratios are reported as of the 1/31/20 Annual Report and are referenced in the 5/31/20 prospectus. The Adviser has contractually agreed to waive fees through 5/31/21.

**CREDIT TYPE**

Fund holdings and sector allocations are subject to change and are not recommendations to buy or sell any security. Other includes investments in affiliated funds, common and preferred equity, collateralized debt obligations, and residential mortgage loans. Totals may not equal 100% due to rounding.

**30-Day SEC Yield:** The SEC yield is an annualized yield based on the most recent 30-day period. Subsidized yields reflect fee waivers in effect. Without such waivers, yields would be reduced. Unsubsidized yields do not reflect fee waivers in effect.

**Bloomberg Barclays U.S. Aggregate Bond Index:** An unmanaged index that measures the performance of the investment-grade universe of bonds issued in the United States. The index includes institutionally traded U.S. Treasury, government sponsored, mortgage and corporate securities.

**Correlation:** A statistical measure of how two securities move in relation to another. Index used for comparison is the Bloomberg Barclays U.S. Aggregate Bond Index.

**Distribution Yield:** The distribution yield is calculated by annualizing actual dividends distributed for the monthly period ended on the date shown and dividing by the net asset value on the last business day for the same period. The yield does not include long- or short-term capital gains distributions.

**Floating Rate:** A floating-rate security is an investment with interest payments that float or adjust periodically based upon a predetermined benchmark.

**Sharpe Ratio:** A statistical measure that uses standard deviation and excess return to determine reward per unit of risk. A higher Sharpe ratio implies a better historical risk-adjusted performance. The Sharpe ratio has been calculated since inception using the 3-month Treasury bill for the risk-free rate of return.

**Standard Deviation:** A statistical measure of portfolio risk used to measure variability of total return around an average, over a specified period of time. The greater the standard deviation over the period, the wider the variability or range of returns and hence, the greater the fund's volatility—calculated since inception.

It is not possible to invest directly in an index.

Past performance is no guarantee of future results.

Mutual fund investing involves risk; principal loss is possible. Investments in debt securities typically decrease when interest rates rise. This risk is usually greater for longer-term debt securities. Investments in lower-rated and nonrated securities present a greater risk of loss to principal and interest than higher-rated securities do. Investments in asset-backed and mortgage-backed securities include additional risks that investors should be aware of, including credit risk, prepayment risk, possible illiquidity, and default, as well as increased susceptibility to adverse economic developments. Derivatives involve risks different from—and in certain cases, greater than—the risks presented by more traditional investments. Derivatives may involve certain costs and risks such as illiquidity, interest rate, market, credit, management, and the risk that a position could not be closed when most advantageous. Investing in derivatives could lead to losses that are greater than the amount invested. The Fund may make short sales of securities, which involves the risk that losses may exceed the original amount invested. The Fund may use leverage, which may exaggerate the effect of any increase or decrease in the value of securities in the Fund's portfolio or higher and duplicative expenses when it invests in mutual funds, ETFs, and other investment companies. For more information on these risks and other risks of the Fund, please see the Prospectus.
