Notification of Source of Distributions

Pursuant to Rule 19a-1 under the Investment Company Act of 1940

DISTRIBUTION PAID DATE: 9/29/23

DISTRIBUTION AMOUNT PER COMMON SHARE: \$0.1090

In connection with the monthly distribution payment of \$0.1090 per share payable on September 29, 2023, to shareholders of record on September 15, 2023, it is anticipated that 52% of such distribution will be a return of capital.

The following table sets forth the estimated amounts of the current distribution, paid September 29, 2023, and the cumulative distributions paid this fiscal year-to-date from the following sources: net investment income, net realized short-term capital gains, net realized long-term capital gains, return of capital or other capital source. The Fund estimates that it has distributed more than its income and net realized capital gains; therefore, a portion of your distribution may be a return of capital. A return of capital may occur, for example, when some or all the money that you invested in the Fund is paid back to you. A return of capital distribution does not necessarily reflect the Fund's investment performance and should not be confused with 'yield' or 'income'. All amounts are expressed per common share.

The amounts and sources of distributions reported in this notice are estimates on a book basis, are not being provided for tax reporting purposes and may later be determined to be from taxable net investment income, short-term gains, long-term gains (to the extent permitted by law) and return of capital. The actual amounts and sources for tax reporting purposes will depend upon the Fund's investment experience during the remainder of the fiscal year and may be subject to changes based on tax regulations. The Fund will send you a Form 1099-DIV for the calendar year that will tell you how to report these distributions for federal income tax purposes. As a result, shareholders should not use the information provided in this notice for tax reporting purposes.
